

## PUBLIC SERVICE ANNOUNCEMENT

**Voice over length: 30 seconds**

I'm \_\_\_\_\_, with the (name of fire department). The most common cause of fire during the holidays is cooking. With all the hustle and bustle of the season, it's important to keep a close eye on your cooking.

Cooking left unattended can ruin your celebrations. If you must leave the kitchen while cooking, turn off the stove and remove the pot from the burner. If a pot does catch fire, carefully slide a lid over it to smother the flames, then turn off the stove.

A message from the (name of fire department) and this station.
